SNOW PAC

FOR SURGERY POSITIONING PATIENTS

Snow Pac provides more stable and comfortable positioning for patient, saves valuable time for the entire O.R. team in every case.

It prevents pressure points.

aids to achieve comfortable position.

It aids faster, easier set-up.

aids better surgery position presentation.

PRINCIPLE OF SYSTEM

Before

Snow-Pacs are soft pads (available in various sizes and shapes) that are filled with thousands of tiny plastic beads.

The Snow-Pac is molded around the patient and then a suction line is attached to it.

As a vacuum is created inside the Snow-Pac within 15 seconds, outside atmospheric pressure forces the beads together so they cannot move.

After

When the suction line is disconnected, the Snow-Pac retains its firm, molded shape and holds the patient securely in position.

After surgery, the valve is opened, and as air reenters into the Snow-Pac it becomes soft again, ready for reuse.

EFFECT

More Stable

Because Snow Pacs are molded completely and firmly to shape of the patient's body and more securely than sandbags, towel rolls and other devices that are merely propped against the patient.

More Comfortable

The apparent wrinkles are inverted-drawn inward by suction and will not irritate the skin.

Better Presentation

With Snow Pacs the patient can be positioned exactly as the surgeon desires for the best presentation of the operative site. Snow Pacs conform to any shape, so the patient's position does not have to be compromised.

More Versatile

With Snow Pacs patient can often be placed in positions that could not be easily achieved using other positioning devices.

No Pressure Points

A Snow-Pac supports all parts of the patient's body uniformly, like a floatation mattress. Weight is distributed evenly, instead of being supported only by the bony prominences, which leads to pressure point injuries.

Saves Time

Patients can be positioned much more quickly and easily using Snow Pacs, and if necessary, be repositioned during a case.

OTHER FEATURES

Any Vacuum Source

Use wall suction, aspirator pump or any other convenient O.R. vacuum source.

Reusable

Snow Pacs give years of O.R. service. Rubberized vinyl fabric is soft but durable.

Radiolucent

Excellent radio transparency with only minimal and clearly identifiable artifacts.

Clean, Disinfect, Sterilize

Can be cleaned with regular soaps and liquid disinfectants or sterilized by gas.

Saves Money

Snow Pacs save the cost of sandbags, towel rolls and other positioning devices, and they save time in every case.

Repair Service

Factory inspection and repair service is available at nominal cost after warranty period.
Full One Year Warranty.

INDICATION

KIDNEY POSITION, LATERAL POSITION

A type

A-1 type
A-1-1 type

A-1-2 type
A-1-3 type

Easily up in nephrectomy (A type), and also for handicapped person with cerebral palsy.(A-1 type).

A type	73(L) * 100(W)cm
A-1 type	73(L) * 100(W)cm
A-1-1 type	90(L) * 100(W)cm
A-1-2 type	73(L) * 100(W)cm(U)
A-1-3 type	90(L) * 100(W)cm(U)

THYROID POSITION

B type
B-1 type

Provides hyperextension, prevents postoperative discomfort.

B type	72(L) * 88(W)cm
B-1 type	118(L) * 88(W)cm

HEAD STABILIZATION POSITION

C type

Stabilizes head in eye, facial or dental surgery.

C type	30(L) * 40(W)cm
--------	-----------------

SUPINE POSITION

D type

Supports and eliminates back pains during long procedures.

Prevents foot drop splint in Emergency.

D type	30(L) * 55(W)cm
--------	-----------------

VARIOUS FULL BODY POSITION

E type

E type	165(L) * 72(W)cm

SK-20-2 28(L) * 7(W) * 5(H)cm

Operating Room

ENDOSCOPE INSTRUMENT CASE

SK-20-3

For Endoscope Instrument.
Silicon bar is placed to prevent laparoscopic instrument to move freely.
Cases are designed to withstand repeated exposure to 134°C steam temperature.
SK-20-3 is used for endoscope camera case.

Steam / EO / Plasma Sterilizable

(External)
SK-20-3 37(L) * 15(W) * 7(H)cm

LAPAROSCOPIC INSTRUMENT CASE

SK-20-4

Silicon bar is placed to prevent laparoscopic instrument to move freely.
Cases are designed to withstand repeated exposure to 134°C steam temperature.

Steam / EO / Plasma Sterilizable

It contains 2pcs or more of laparoscopic instrument.

(External)
SK-20-4 60(L) * 20(W) * 6(H)cm

LONG SCOPE INSTRUMENT CASE

SK-20-5

Sterilization cases used during laparoscopic long scope and robotic instrument surgery.

Silicon bar or mat is placed to prevent movement of instruments used in obstetrics, urology, otorhinolaryngology, surgery and robotic surgery.

Two or more laparoscopic instruments can be inserted.

Cases are designed to withstand repeated exposure to 134°C steam temperature.

Steam / EO / Plasma Sterilizable

(External)

SK-20-5 72(L) * 15(W) * 10(H)cm

LAPAROSCOPIC INSTRUMENT CASE

Silicon bar is placed to prevent laparoscopic instrument to move freely.

Cases are designed to withstand repeated exposure to 134°C steam temperature.

Steam / EO / Plasma Sterilizable

It contains 10pcs of laparoscopic instrument.

(External)

GEL PRODUCTS

Capillary closure is at the root of ulcer formation.
 The blockage or damage of capillaries prevents the natural maintenance of healthy skin.
 In operation, the use of proper positioning devices prevent excessive pressure build-up and capillary closure.
 Evenly distribute weight and provide constant support beneath patients.
 Gel products are cost effective, latex free, fast & easy cleaning, radiolucent tissue equivalent.

DOUGHNUT GEL HEAD PAD

Doughnut gel head pad provides excellent protection when the patient is positioned for surgery by supine position.

SK-22 (Adult)	20(D) * 4.5(H)cm
SK-22-3 (Child)	15(D) * 3.5(H)cm
SK-22-4 (Baby)	9.2(D) * 2.4(H)cm

C-DOUGHNUT GEL HEAD PAD

C-doughnut gel head pad provides clear air passage way when the patient is positioned for surgery by lateral or prone position.

SK-22-1 (Adult)	21(D) * 4.5(H)cm
SK-22-1-1 (Child)	15(D) * 3.5(H)cm
SK-22-1-2 (Baby)	9.2(D) * 2.4(H)cm

GEL OPHTHALMIC HEADREST

It was designed for stable head placement for all ophthalmic and oral or facial procedures.

Also provides patient with comfort while under local anesthesia, minimizing patient movement.

It was also designed for surgeon's functional arm support.

SK-22-a (Adult)	31(L) * 27(W) * 10(H)cm
SK-22-b (Child)	31(L) * 25(W) * 7.3(H)cm

GEL OPHTHALMIC CRADLE HEADREST

It was designed for ENT, plastic surgery, all ophthalmic cases.

It helps prevent risk of alopecia especially during long surgery.

Cradling of patient's head provides stability.

SK-22-c (Adult)	23(L) * 23(W) * 5.7(H)cm
SK-22-d (Child)	19(L) * 21.6(W) * 3.8(H)cm

GEL HEAD PAD

It provides optimum stability of patient's head while in the supine position.

Can also be used for position and protect the knee or calf.

SK-22-e (Adult)	18(L) * 18(W) * 8(H)cm
SK-22-5 (Baby)	16(L) * 12(W) * 1(H)cm

PRONE GEL HEAD PAD

It provides clear air passage way when the patient is positioned for surgery by prone position.

SK-22-2	27(L) * 24(W) * 15(H)cm
SK-22-2-1	27(L) * 21(W) * 8(H)cm

Operating Room

GEL BODY PAD

Gel body pad provides complete pressure reduction and shares across entire table surface

SK-23-2	84(L) * 50(W) * 1.3(H)cm
SK-23	160(L) * 50(W) * 1.3(H)cm
SK-23-1	183(L) * 50(W) * 1.3(H)cm

GEL BODY PAD 3-PIECE SET

This set includes head, torso and foot section pads for use with segment tables.

SK-23-1-1 Gel body pad 3-piece set (a+b+c)	
SK-23-1-1a(Head)	50(L) * 23(W) * 1.3(H)cm
SK-23-1-1b(torso)	100(L) * 50(W) * 1.3(H)cm
SK-23-1-1c(foot)	50(L) * 50(W) * 1.3(H)cm

GEL INCUBATOR PAD

It provides gentle pressure for neo-natal patients in the NIC units. It is designed for the isolette beds.

SK-23-5	60(L) * 33(W) * 1.3(H)cm
SK-23-5-1	60(L) * 40(W) * 1.3(H)cm

GEL CHAIR PAD

Gel chair pad is used underneath prominence area in a variety of applications.

SK-24	42(L) * 42(W) * 1.3(H)cm
SK-24-2	38(L) * 38(W) * 1.3(H)cm
SK-24-2-1	40(L) * 40(W) * 1(H)cm
SK-24-2-2	40(L) * 45(W) * 1(H)cm
SK-24-3	32(L) * 32(W) * 1.3(H)cm

GEL EMBO PAD

Gel embo chair pad is used for iliac crest, under heels and elbows. Is used as kidney rest, axillary roll while patient in lateral position.

Gel embo odyp ad provides complete pressure reduction and shears cross entiret ablesur face.

Gel embo chair pad	
SK-24-1	40(L) * 45(W) * 1.6(H)cm
Gel e mbo h alf body pad	
SK-23-4	80(L) * 45(W) * 1.6(H)cm
Gel embo body pad	
SK-23-3	160(L) * 45(W) * 1.6(H)cm

GEL KNEE PAD

Gel knee pad is used for OBGY surgery in lithotomy position. It provides against nerve injury.

SK-25	40(L) * 24(W) * 1(H)cm
SK-25-1	50(L) * 52(W) * 1(H)cm

GEL LATERAL PAD/GEL

GEL THYROID PAD

Gel lateral pad is designed to accommodate both the shoulder and provides exceptional pressure relief and nerve protection.

Gel thyroid pad is designed for thyroidectomy. It provides patient with gentle pressure while long surgery with hyperextension position. The tissue friendly feels make it very comfortable.

SK-26	70(L) * 50(W) * 12(H) / 0.8cm
SK-26-2	45(L) * 30(W) * 7(H)cm

GEL PATIENT POSITIONER

It is good for any procedure. versatile positioner.

SK-27-a(Small)	25(L) * 13(W) * 3(H)cm
SK-27-b(Large)	35(L) * 12(W) * 3(H)cm
SK-27-c(Extra long)	46(L) * 11(W) * 3(H)cm

GEL PRONE CHEST PAD

They were designed for uniformly conform to a patient s shoulder to chest area, with rounded edges for the axilla.

They provide optimum alleviating pressure on the thorax area.

SK-27-d(Right)	70/58(L) * 20(W) * 5(H)cm
SK-27-e(Left)	70/58(L) * 20(W) * 5(H)cm

GEL SHOULDER PAD (CHEST)

Semi-circular design provides maximum pressure protection while patient is in supine position.

SK-27, 27-4 can be used under the knee, the foot against the board.

While patient is in lateral position, SK-27 can be used for the shoulder protection.

In thyroidectomy , SK-27-4 is used for neck hyperextension.

while patient is in prone position SK-27-1, SK-27-2 can be used under the chest.

SK-27	47(L) * 10(W) * 5(H)cm
SK-27-1	47(L) * 15(W) * 8(H)cm
SK-27-2	47(L) * 15(W) * 12(H)cm
SK-27-3	25(L) * 15(W) * 8(H)cm
SK-27-4	52(L) * 10(W) * 8(H)cm

Operating Room

GEL HEEL PAD

Gel heel pad provides safety and protects heel area body prominence.

SK-28	20(L) * 11(W) * 7(H)cm
-------	------------------------

GEL HEEL SUPPORTER

GEL HEEL CUP

It protects heel area without hook and loop attachment.

It protects the patient's Achilles tendon area.

It supports heels. Appropriate for recovery.

SK-28-1	16(L) * 8.5(W) * 5(H)cm
SK-28-2	17(L) * 18(W) * 1.3(H)cm

GEL HEEL PROTECTOR

It supports heels appropriately for recovery.

SK-28-3	17(L) * 23(W) * 1.3(H)cm
---------	--------------------------

SK-5-1a	52(L) * 31(W) * 1.3(H)cm

GEL RELTON FRAME PAD (4 PIECE SET)

It provides comfort and safety in prone position spine surgery.

SK-17-1-1	1.3(thick)cm
-----------	--------------

GEL FOREARM PROTECTOR

SK-17-2

It is used for nerve protection of arm and elbow in supine position surgery.

SK-17-2 Gel forearm protector(L)
46(L) * 21(W) * 0.8(H)cm

SK-17-2-1 Gel forearm protector(S)
38(L) * 11.5(W) * 0.8(H)cm

GEL BODY BELT

SK-17-3

It helps safety, stability and tissue protection during surgery.

SK-17-3 50(L) * 8.5(W) * 0.8(H)cm

GEL SHOULDER PROTECTOR

SK-17-3-1

It is designed for patient in trendelenburg down position to protect shoulder areas.

SK-17-3-1 16(L) * 15(W) * 2(H)cm

GEL ALLEN PAD

SK-17-4-1

It is used lithotomy position for nerve protection.

SK-17-4-1 68(L) * 38(W) * 1(H)cm

**GEL ANKLE HOLDER
(2 PIECE SET)**

SK-17-5

It is used in lithotomy position for nerve protection.

SK-17-5 40(L) * 3(W) * 1(H)cm

GEL SNOW PAC A-1 type COVER

SK-17-6

Designed for A-1 type snow pac. It provides comfort.

SK-17-6 100(L) * 73(W) * 1(H)cm

GEL SNOW PAC B type COVER

SK-17-6-1

Designed for B type snow pac.

SK-17-6-1 88(L) * 72(W) * 1(H)cm

GEL SNOW PAC C type COVER

SK-17-6-2

Designed for C type snow pac.

SK-17-6-2 30(L) * 40(W) * 1(H)cm

Rehabilitation

GEL WHEELCHAIR CUSHION PAD WITH COVER

It was made with a high-quality polyurethane gel and PU foam.

It provides excellent pressure relief.

The gel material will not migrate, leak, evaporate, harden or dry out if the cushion is accidentally punctured.

The material is highly resistant to bacteria and bodily fluids, and can be easily cleaned with warm soapy water or a disinfectant.

It offers excellent pressure reduction and pain relief combination for people with low to moderate risk of skin breakdown.

It provides excellent immersion stability and pressure distribution.

It provides great comfort and excellent positioning stability. The gel material also helps dissipate heat buildup.

4" cushion provides long-term positioning support and excellent comfort.

It is applied for individuals with a history of skin breakdown or those who suffer from pressure sores.

Lead Masks

PANORAMA SHIELD

400PSM

The 400PSM Panorama Shield consists of a Face Formed Radiation Protective Lead Impregnated Acrylic Shield that is suspended from a dual adjustable headpiece.

The acrylic shield can be positioned at any angle to the face so as to minimize scatter radiation from passing under the shield by side adjustable dials. The headgear is adjustable in two positions.

An adjustable headband that saddles the crown of the head while connecting at a 90 angle to an adjustable headband that surrounds the head circumference from brow to back. The circumference portion of the headband has an adjustable dial in the rear to increase or decrease the hat size for a comfortable, snug fit.

Wipe clean with a soft cloth. Abrasive materials may scratch front lens.

Cannot be sterilized with high temperatures or high pressure.

- ◆ Weight : 350 grams
- ◆ Protection : .10mm Lead Acrylic ◆ Material : Acrylic/Nylon

PANORAMA SHIELD

400PSM

PANORAMA MASK

450FPM

The 450FPM Panorama Mask consists of a Face Formed Radiation Protective Lead Impregnated Acrylic Shield that is suspended from an adjustable headpiece.

The stationary acrylic shield extends from a headpiece brow connector for a length of 8 inches from top to bottom in front of the entire face. A support strap saddles the crown of the head while connecting at a 90 angle to an adjustable headband that surrounds the head circumference from brow to back.

The circumference portion of the headband has an adjustable strap in the rear to increase or decrease the hat size for a comfortable, snug fit. Wipe clean with a soft cloth.

Abrasive materials may scratch front lens. Cannot be sterilized with high temperatures or high pressure.
